1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 11,12,15-18,21,22,25-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al US 6020045 taken in view of Arita et al US 5976714 and Goto US 6287663 .

Chen discloses a magnetic recording medium, comprising: a non magnetic substrate including at least one major surface having a contact start/stop or landing zone and a data zone. The substrate surface in the CSS zone or landing zone comprising a pattern of texture. The limitation "embossed" is considered a process limitation. Process limitations are give no weight in article claims unless they can be shown to produce a patentable article. The texture is produced by irradiation of a pulsed laser onto a substrate and the shape and frequency is optimized. See Col 2 lines 49-61; Col 5 lines 50-53. While Chen expresses no preference for recesses over protrusions the prior art recognizes their equivalence as texture produced by pulsed laser irradiation. See Arita et al Fig 4(a) Col 3 lines 31-34 and Goto Figure 2.

Substitution of equivalents requires no express motivation as long as the prior art recognizes the equivalency.

In re Fount 213 USPQ 532 (CCPA 1982); In re Siebentritt 152 USPQ 618 (CCPA 1967); Graver Tank & Mfg. Co. Inc. v. Linde Air Products Co. 85 USPQ 328 (USSC 1950).

Since Chen teaches the optimization of texture in each zone, therefore it would have been obvious to one of ordinary skill in the art to modify the texture to optimize performance with a given head design. The limitations of claims 12,15-18,22,25-28 are found in the examples of the cited references and are members of Markush Groups of equivalent functional materials .

3. Claims 13,14,23,24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stevan A. Resan whose telephone number is 571-272-1513. The examiner can normally be reached on Tues-Thurs from 7:30 AM to 6:00 PM.
